

CUSTOMER VOICES

Sunshine Mining and Refining Company

Located in the heart of Idaho's Silver Valley, the Sunshine Mine boasts a mineral endowment of more than 360 million ounces of silver. It's historically one of the largest and most productive mines in the United States.

With an eye towards expansion, the team at Sunshine Silver Mine reached out to Tunnel Radio to conduct a detailed survey of the mine, including on-site training, essential to realizing their growth efforts.

WHAT THEY SAID ABOUT WORKING WITH TUNNEL RADIO

"Working with the Tunnel Radio Technical Team has been a game-changer. From the site survey to ongoing support, their professionalism and expertise have consistently exceeded our expectations.

Their on-site training was tailored to our team's experience, helping both engineers and field techs feel confident using the Tunnel Radio system—ensuring we fully understood the technology and its real-world application.

Overall, the Tunnel Radio team is knowledgeable, responsive, and genuinely invested in our success. More than just a vendor, they're a true partner in maintaining safe, efficient underground communication."

Brian Higdem,
Maintenance Superintendent, Sunshine Mining & Refining
