

WIRELESS CAMPUS COMMUNICATION

No cell phone, no problem—a new layer of campus security & communication

Keep your entire campus connected—from maintenance tunnels to far-off dormitories—with an all-in-one radio and communications system.

Campus-wide connectivity

Our portable, wireless radio network offers seamless communication across multiple buildings, as well as in stadium tunnels, basements, underground parking garages, and areas where cellular coverage is spotty or non-existent.

Emergency-ready communication

Make 911 calls and keep staff connected with a reliable backup system that works even when landlines and cell phones fail.

Peace of mind for parents

As states implement school-wide cell phone bans, parents have expressed concern about access in an emergency. Our wireless systems aren't just radios—they can make calls to 911 and outside numbers, ensuring students and staff can always reach help when needed.

Complete support

We'll partner with you from day one to ensure your campus is covered.

- Collaborative site assessment and system design
- Professional installation with minimal disruption
- 24/7 remote technical support
- Software and firmware updates included

Ready to enhance the safety of your campus?

We'd love to design a custom solution that meets your needs. Contact us today to schedule a no-obligation site review with one of our experienced representatives.

Keep your teams connected under all conditions, from anywhere on your campus, with Tunnel Radio's rugged and reliable fiber optic extension system.
